Android Hacker's Handbook - Joshua J. Drake - 2014-03-26

The first comprehensive guide to discovering and preventing attacks on the Android OS As the Android operating system continues to increase its share of the smartphone market, smartphone hacking remains a growing threat. Written by experts who rank among the world's foremost Android security researchers, this book presents vulnerability discovery,

analysis, and exploitation tools for the good guys. Following a detailed explanation of how the Android OS works and its overall security architecture, the authors examine how vulnerabilities can be discovered and exploits developed for various system components, preparing you to defend against them. If you are a mobile device administrator, security researcher, Android app developer, or consultant responsible for evaluating Android security, you will find this guide is

essential to your toolbox. A crack team of leading Android security researchers explain Android security risks, security design and architecture, rooting, fuzz testing, and vulnerability analysis. Covers Android application building blocks and security as well as debugging and auditing Android apps. Prepares mobile device administrators, security researchers, Android app developers, and security consultants to defend Android systems against attack. **Android Hacker's Handbook** is the first comprehensive resource for IT professionals charged with smartphone security.

Gradle in Action - Benjamin Muschko - 2014-02-19
Summary Gradle in Action is a comprehensive guide to end-to-end project automation with Gradle. Starting with the basics, this practical, easy-to-read book discusses how to build a full-fledged, real-world project. Along the way, it touches on advanced topics like testing, continuous integration, and monitoring code quality. You'll also explore tasks like setting up your target environment and deploying your software. About the Technology Gradle is a general-purpose build automation tool. It extends the usage patterns established by its forerunners, Ant and Maven, and allows builds that are expressive,

maintainable, and easy to understand. Using a flexible Groovy-based DSL, Gradle provides declarative and extendable language elements that let you model your project's needs the way you want. An Indigenous Peoples' History of the United States

- Roxanne Dunbar-Ortiz - 2014-09-16

Now part of the HBO docuseries "Exterminate All the Brutes," written and directed by Raoul Peck 2015 Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted

expansion of the US empire. With growing support for movements such as the campaign to abolish Columbus Day and replace it with Indigenous Peoples' Day and the Dakota Access Pipeline protest led by the Standing Rock Sioux Tribe, *An Indigenous Peoples' History of the United States* is an essential resource providing historical threads that are crucial for understanding the present. In *An Indigenous Peoples' History of the United States*, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army

general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes the silences that have haunted our national narrative. *An Indigenous Peoples' History of the United States* is a 2015 PEN Oakland-Josephine Miles Award for Excellence in Literature.

of my life, and I'm going big this time. We're talking boom box, sing her name in the rain, let the whole damn neighborhood know I'm good and ready this time around. After all, if you're going to grand gesture the ever-loving hell out of a second chance, you need to pull out all the stops. There's only one little problem. My college girlfriend isn't the one who shows up when I play my "I'll do anything to win you back" tune. The woman who flings open the second-floor window tells me my ex doesn't live here anymore. But she'll help me win her back. Anything for romance, anything for a guy so willing to go big for love. And that's what I want at first. Until I get to know my new "romance coach" and discover she's funny, clever, and keeps me on my toes. And boy, do I ever need that. Now I don't want to win anyone else's heart. I want the woman who's been helping me all along. Trouble is - she thinks I'm in love with someone else, and when we take off on a road trip, everything I think I know about women is about to be unzipped and turned inside out. *Unzipped is a standalone

Screen Genealogies -

Craig Buckley - 2019-11-15
Against the grain of the

growing literature on screens, *Screen Genealogies* argues that the present excess of screens cannot be understood as an expansion and multiplication of the movie screen nor of the video display. Rather, screens continually exceed the optical histories in which they are most commonly inscribed. As contemporary screens become increasingly decomposed into a distributed field of technologically interconnected surfaces and interfaces, we more readily recognize the deeper spatial and environmental interventions that have long been a property of screens. For most of its history, a screen was a filter, a divide, a shelter, or a camouflage. A genealogy stressing transformation and descent rather than origins and roots emphasizes a deeper set of intersecting and competing definitions of the screen, enabling new thinking about what the screen might yet become.

Towards Sustainable Innovation - Sven Pastoors - 2017-03-13
With sustainability having gained a lot of momentum

over the last years and companies implementing strategies to create corporate sustainability, there are lots of opportunities for innovation. Thus, the two concepts of sustainability and innovation should not be considered separately - they are closely interlinked with one another. The main goal of sustainable innovation is to develop new products and technologies that have a positive impact on the company's triple-bottom-line. To meet this aim, they have to be ecologically and economically beneficial as well as socially balanced. In order to help companies to improve their sustainable innovation process practically, this book is structured into five possible phases of a sustainable innovation process: Awareness of a sustainability problem, Identification & Definition of the problem, Ideation & Evaluation of the solutions, Testing & Enrichment of the solutions, Implementation of the solutions & Green Marketing.

Chemical Metallurgy - Chiranjib Kumar Gupta - 2006-03-06

Chemical metallurgy is a well founded and fascinating branch of the wide field of metallurgy. This book provides detailed information on both the first steps of

separation of desirable minerals and the subsequent mineral processing operations. The complex chemical processes of extracting various elements through hydrometallurgical, pyrometallurgical or electrometallurgical operations are explained. In the choice of material for this work, the author made good use of the synergy of scientific principles and industrial practices, offering the much needed and hitherto unavailable combination of detailed treatises on both compiled in one book.

Conditioning for Climbers

- Eric Horst - 2008-05-01
The only conditioning book a rock climber needs! Rock climbing is one of the most

physically challenging sports, testing strength, endurance, flexibility, and stamina. Good climbers have to build and maintain each of these assets. This is the first-ever book to provide climbers of all ages and experience with the knowledge and tools to design and follow a comprehensive, personalized exercise program. Part One covers the basics of physical conditioning and goal-setting. Part Two takes readers through warm-up and flexibility routines, entry-level strength training, weight loss tips, and fifteen core-conditioning exercises. Part Three details climbing-specific conditioning, with twenty exercises to target specific muscles of the fingers, arms and upper torso to develop power and endurance. An entire chapter focuses on the antagonist muscle groups that help provide balance and stability, and prevent muscle injury. This section also has a chapter devoted to stamina conditioning, increasing the climber's endurance at high altitudes. Part Four shows how to put together a customized training program to suit the climber's needs.

The book includes workout sheets for Beginner, Intermediate, and Advanced skill levels, tips for children and those over age fifty, secrets of good nutrition and an insider's take on avoiding injuries. Eric Hörst is a performance coach who has helped thousands of climbers. His published works include Learning to Climb Indoors, Training for Climbing, and How to Climb 5.12. He lives in Lancaster, Pennsylvania.

Statin-Associated Muscle Symptoms - Paul D.

Thompson - 2020-01-25

This book provides an overview of statin-associated muscle symptoms (SAMS) from clinical presentation to treatment and possible metabolic causes. It examines

the risk factors, presentations, diagnosis and differential diagnosis, clinical management, and financial costs of SAMS. The book also highlights patients' perspectives on SAMS such as the psychosocial, emotional, and societal factors influencing their perceptions and experiences. Finally, the book presents the results of observational and clinical trials on the prevalence of SAMS, clinical trials for treatments, and potential future research approaches for improving the understanding and treatment of SAMS. A key addition to the Contemporary Cardiology series, Statin-Associated Muscle Symptoms is an essential resource for physicians, medical students, residents, fellows, and allied health professionals in cardiology, endocrinology, pharmacotherapy, primary care, and health promotion and disease prevention.

dream. Beat the odds as you learn from the best - including Henry Ford, Steve Jobs, and Bill Gates - and turn your idea into an amazing and profitable enterprise. The Business Book helps you over the hurdles facing every new business, such as finding a gap in the market, securing finance, employing people, and creating an eye-catching brand. It is a plain-speaking visual guide to 80 of the most important commerce theories including chaos theory, critical path analysis, market mapping, and the MABA matrix. Its graphics and flow diagrams demystify complicated concepts and explain the ideas of seminal business thinkers, such as Malcolm Gladwell's "tipping point" or Michael Porter's "five forces". It shows that you can succeed with stories of rags-to-riches entrepreneurs, including the founders of Hewlett-Packard, who began their global enterprise from their garage. Whether you are a student, a CEO, or a would-be entrepreneur, The Business Book will inspire you and put you on the inside track to making your goal a reality. Series Overview: Big

pilgrimage to Mecca. By the time he returned twenty-nine years later, he had visited most of the known world, travelling three times the distance Marco Polo covered. Spiritual backpacker, social climber, temporary hermit and failed ambassador, he braved brigands, blisters and his own prejudices. The outcome was a monumental travel classic. Captivated by this indefatigable man, award-winning travel writer Tim Mackintosh-Smith set out on his own eventful journey, retracing the Moroccan's eccentric trip from Tangier to Constantinople. Tim proves himself a perfect companion to this distant traveller, and the result is an amazing blend of personalities, history and contemporary observation.

Creation Myths and Legends of the Creek Indians -

Bill Grantham -

2009-09-01

"A long-needed study of the creation stories and legends of the Creek Indian people and their neighbors including the influential Yuchi legends and Choctaw myths as well as those of the Hitchiti, Alabama, and Muskogee." -Charles R. McNeil, Msueum of Florida History, Tallahassee The creation stories, myths, and migration legends of the Creek Indians who once populated southeastern North America are centuries--if not

millennia--old. For the first time, an extensive collection of all known versions of these stories has been compiled from the reports of early ethnographers, sociologists, and missionaries, obscure academic journals, travelers' accounts, and from Creek and Yuchi people living today. The Creek Confederacy originated as a political alliance of people from multiple cultural backgrounds, and many of the traditions, rituals, beliefs, and myths of the culturally differing social groups became communal property. Bill Grantham explores the unique mythological and religious contributions of each subgroup to the social entity that historically became known as the Creek Indians. Within each topical chapter, the stories are organized by language group following Swanton's classification of southeastern tribes: Uchean (Yuchi), Hitchiti, Alabama, Muskogee, and Choctaw--a format that allows the reader to compare the myths and legends and to retrieve information from them easily. A final chapter on contemporary Creek myths and legends includes

previously unpublished modern versions. A glossary and phonetic guide to the pronunciation of native words and a historical and biographical account of the collectors of the stories and their sources are provided. Bill Grantham, associate professor of anthropology at Troy State University in Alabama, is anthropological consultant to the Florida Tribe of Eastern Creeks. He has contributed chapters to several books, including *The Symbolic Role of Animals in Archaeology*.

Digital Labour and Karl

Marx - Christian Fuchs -
2014-01-03

How is labour changing in the age of computers, the Internet, and "social media" such as Facebook, Google, YouTube and Twitter? In *Digital Labour and Karl Marx*, Christian Fuchs attempts to answer that question, crafting a systematic critical theorisation of labour as performed in the capitalist ICT industry. Relying on a range of global case studies--from unpaid social media prosumers or Chinese hardware assemblers at

Foxconn to miners in the Democratic Republic of Congo--Fuchs sheds light on the labour costs of digital media, examining the way ICT corporations exploit human labour and the impact of this exploitation on the lives, bodies, and minds of workers.

Rescue of Sturgeon Species in the Ural River Basin -

Viktor Lagutov - 2008-10-22
While almost every aspect of society-nature interactions can be treated as an environmental security issue, the threats to human societies originating from inadequate freshwater management constitute one of the most widespread and pressing problems. For thousands of years rivers and river valleys have been the cradle of human civilizations. Rivers have provided not only food and freshwater, but also shelter and means of transportation, and they are still an essential component in every national and regional economy. In turn, growing

needs of human societies, accompanied by growing abilities, have caused significant river alterations and ecosystem changes that have resulted in river contamination, biodiversity loss and general riverine ecosystem degradation. The extinction of sturgeon species is one of the most eloquent examples of the negative and irreversible influence of human society on river e-systems. The sturgeon, sometimes called the “living fossil” or living “dinosaur” of the fish world, is known to have lived since the time of the dinosaurs, for at least 250 million years, and is currently on the verge of extinction solely due to anthropogenic impacts.

This volume presents a series of carefully selected papers on the theme of Intelligent Interactive Multimedia Systems and Services (IIMSS-18), but also including contributions on Innovation in Medicine and Healthcare (InMed-18) and Smart Transportation Systems (STS-18). The papers were presented at the Smart Digital Futures 2018 multi-theme conference, which grouped the AMSTA, IDT, InMed, SEEL, STS and IIMSS conferences in one venue in Gold Coast, Australia in June 2018. IIMSS-18 included sessions on 'Cognitive Systems and Big Data Analytics', 'Data Processing and Secure Systems', 'Innovative Information Services for Advanced Knowledge Activity', 'Autonomous System' and 'Image Processing'. InMed-18 papers cover major areas of 'Digital Architecture for Internet of Things, Big data, Cloud and Mobile IT in Healthcare' and 'Advanced ICT for Medical and Healthcare'. STS-18 papers provide a comprehensive overview of various aspects of

current research into intelligent transportation technology.

Remote Sensing Handbook for Tropical Coastal Management

- Christopher D. Clark - 2000

The Handbook provides a detailed evaluation of what can realistically be achieved by remote sensing in an operational coastal management context. It takes the user through the planning and implementation of remote sensing projects from the setting of realistic objectives, deciding which imagery will be most appropriate to achieve those objectives, the acquisition, geometric and radiometric correction of imagery, the field survey methods needed to ground-truth the imagery and guide image classification, the image processing techniques required to optimise outputs, through the image interpretation and evaluation

of the accuracy of outputs. Linked to the Handbook is a computer-based remote sensing distance-learning module: Applications of satellite and airborne image data to coastal management available free of charge via www.unesco.bilko.org

The Consumer Action Handbook - - 2002

The Cambridge Handbook of Consumer Privacy - Evan Selinger - 2018-04-02

Businesses are rushing to collect personal data to fuel surging demand. Data enthusiasts claim personal information that's obtained from the commercial internet, including mobile platforms, social networks, cloud computing, and connected devices, will unlock path-breaking innovation, including advanced data security. By contrast, regulators and activists contend that corporate data practices too often disempower consumers by creating privacy harms and related problems. As the Internet of Things matures and facial recognition,

predictive analytics, big data, and wearable tracking grow in power, scale, and scope, a controversial ecosystem will exacerbate the acrimony over commercial data capture and analysis. The only productive way forward is to get a grip on the key problems right now and change the conversation. That's exactly what Jules Polonetsky, Omer Tene, and Evan Selinger do. They bring together diverse views from leading academics, business leaders, and policymakers to discuss the opportunities and challenges of the new data economy.

Emarketing - Rob Stokes - 2011-11-01

Review: "This book is a fantastic guide to online marketing, and the Internet in general. As a marketing practitioner, I've been finding my way own way through the online world for some time now but have always wondered if what I was doing was 'correct' and it would take me ages to find out what

I needed to know through researching online articles, blogs, etc. I found this book to be fairly concise and focused. The references to other online articles that it includes are vast and can they be very absorbing. The best part about this is that it is written by someone that clearly has vast experience in the field and, unlike with some online articles, you get the feeling that what is advised is really 'best practice'. I'd recommend this book for anyone interested in digital marketing." Adam Butchart, Digital Marketing student
Blurb: We love the Internet. We love digital and the connected world that we live in. We have spent the last six months gleaning every bit of knowledge, skill and opinion from the creative minds at Quirk. The result is a textbook borne out of more than 12 years of practical experience in the world of digital. For the reader, this translates into applicable insight into marketing in an ever-changing space. This book brings you: 22 Chapters Updated content throughout All new case studies \$480 of vouchers* Used by brands,

creative agencies and students across the world, Quirk's eMarketing textbook sets the standard for all things digital. "Since we published the last edition of the book, it has become increasingly obvious that the various elements of digital marketing work hand in hand, not just benefiting each other through coordination, but actually relying on each other for success." - Rob Stokes (Founder and Group CEO, Quirk) In order to reflect this change, we have restructured the book to mirror our four key agency disciplines: Think, Create, Engage and Optimise. This simplified way of thinking about the digital space makes it easier for students and professionals to benefit from the insights shared.

Biochar - Alberto Tagliaferro
- 2020-12-13

This reference text covers the latest developments in biochar materials research, a field which is becoming increasingly popular due to the potential of biochar to replace carbon materials

derived from non-renewable sources. Emerging and innovative applications of biochar materials are discussed, and all aspects of the field are covered, from production to applications, including details on the techniques used. There is a particular focus on biochar as a material for composites and sensors. This is the first book to cover emerging applications of biochar as an innovative, versatile, carbon-based renewable material, beyond its traditional uses in agriculture. It is a valuable reference for all researchers in the fields of biochar and carbon materials, including industry practitioners. Key Features The first book to cover emerging applications for biochar as an innovative, versatile, carbon-based renewable material, beyond its traditional uses in agriculture Provides comprehensive coverage of emerging and innovative applications for biochar materials, from production to applications, including techniques Focus on biochar as a material for composites and sensors Valuable for all researchers in the fields of

Elon Musk and the Quest for a Fantastic Future
Young Readers' Edition -

Ashlee Vance - 2017-01-24

An in-depth look into the extraordinary life of the world's most important entrepreneur, Elon Musk This fascinating and easily accessible young readers' adaptation of Ashlee Vance's New York Times bestselling *Elon Musk: Tesla, SpaceX, and the Quest for a Fantastic Future* features black-and-white photographs throughout and an epilogue. The version for adults has been praised as "riveting" (The Financial Times), "spirited" (The Wall Street Journal), and "masterful" (Vice). Now younger readers can read about this innovative leader who is revolutionizing three

industries at once: space, automotive, and energy. There are few people in history who could match Elon Musk's relentless drive and vision. A modern combination of famous inventors and industrialists like Thomas Edison, Henry Ford, and Steve Jobs, Elon is the man behind companies such as SpaceX, Tesla Motors, SolarCity, and PayPal that are transforming the way we live. Written with exclusive access to Elon, his family, and his friends, this book traces Elon's journey from a kid in South Africa to a young man in the United States, his dramatic technical inventions, and his world-changing companies. Elon has sparked new levels of innovation in the world, and this book gives young readers a detailed but fast-paced look at his story. A Junior Library Guild Selection!

Diesel Engine Reference

Book - Bernard Challen - 1999

The Diesel Engine Reference Book, Second Edition, is a comprehensive work covering the design and application of diesel engines of all sizes. The first edition was published in 1984 and since that time the diesel engine has made significant advances in application areas from passenger cars and light trucks through to large marine vessels. The Diesel Engine Reference Book systematically covers all aspects of diesel engineering, from thermodynamics theory and modelling to condition monitoring of engines in service. It ranges through subjects of long-term use and application to engine designers, developers and users of the most ubiquitous mechanical power source in the world. The latest edition

leaves few of the original chapters untouched. The technical changes of the past 20 years have been enormous and this is reflected in the book. The essentials however, remain the same and the clarity of the original remains. Contributors to this well-respected work include some of the most prominent and experienced engineers from the UK, Europe and the USA. Most types of diesel engines from most applications are represented, from the smallest air-cooled engines, through passenger car and trucks, to marine engines. The approach to the subject is essentially practical, and even in the most complex technological language remains straightforward, with mathematics used only where necessary and then in a clear fashion. The approach to the topics varies to suit the needs of different readers. Some areas are covered in both an overview and also in some detail. Many drawings, graphs and photographs illustrate the 30 chapters and a large easy to use index provides convenient access to any information the readers requires.

Mysteries of the Rosary -

Emmerich - 2019-10-22
The Most Holy Rosary is one of the greatest prayers in the history of the Church. Garnished as it is with the testimony of saints and Popes for the last thousand years,

the only greater prayers the Mass and the Divine Office. It is a prayer for the people, to be said over and over, and yet, many still seek ways to enter into the deeper mansions of spiritual richness to be found in this devotion.

Drawing Futures - Bob Sheil
- 2016-11-11

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto

unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.
